

PEMBENTANGAN

LESSON LEARNED SISTEM MEKANIKAL DI DALAM BANGUNAN KERAJAAN

Disediakan oleh : Mohd Faiz Fikri Bin Yussoff
Jurutera Mekanikal
Bahagian Rekabentuk Bangunan Am 2
Caw. Kej. Mekanikal
Ibu Pejabat JKR Malaysia

SINOPSIS

- Case Study & sistem Mekanikal terlibat
- Lesson Learnt di peringkat Perancangan
- Lesson Learnt di peringkat Rekabentuk melibatkan sistem Penyamanan Udara & sistem Pencegahan Kebakaran
- Lesson Learnt di peringkat Pembinaan melibatkan sebahagian daripada sistem Mekanikal
- Lesson Learnt di peringkat Pengujian & Petaulahan (T&C) melibatkan sistem Penyamanan Udara & Pengudaraan Mekanikal
- Lesson Learnt dengan pihak Bomba & JKPP untuk projek ini
- Kesan pada projek ini

CASE STUDY

- Naiktaraf Bangunan Kerajaan (pejabat) sedia ada 4 tingkat (aras basmen, bawah, satu & dua).
- Ruang keseluruhan bangunan > 10,000m²
- Ruang pejabat, bilik mesyuarat, bilik seminar, kafeteria, dewan, ruang lobi, bilik elektrikal, surau & lain-lain ruang.

SISTEM PENYAMAN UDARA & PENGUDARAAN MEKANIKAL

- Water Cooled Chiller System
- VRF System
- Building Automation System

SISTEM MEKANIKAL

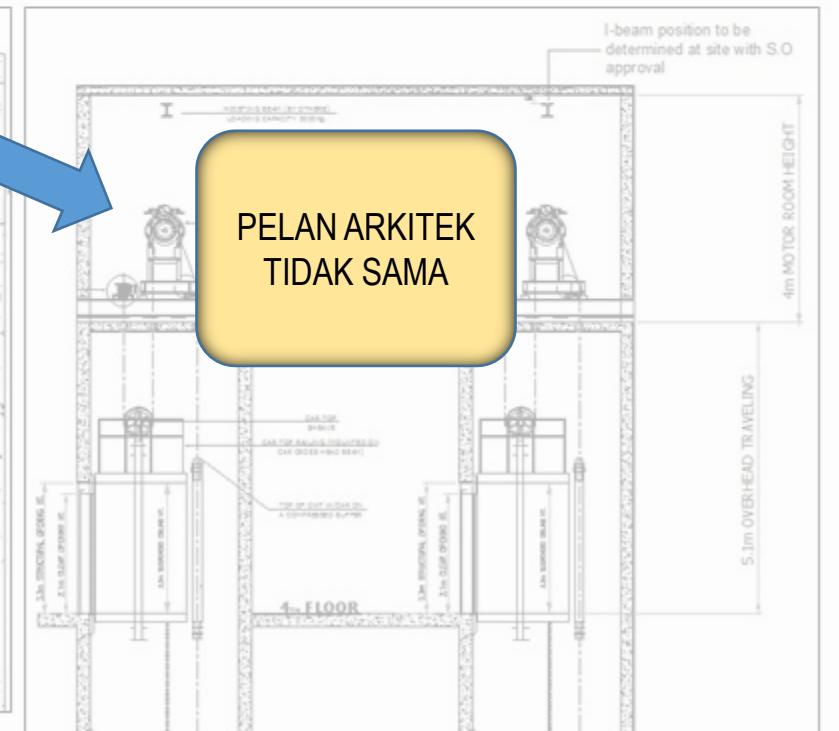

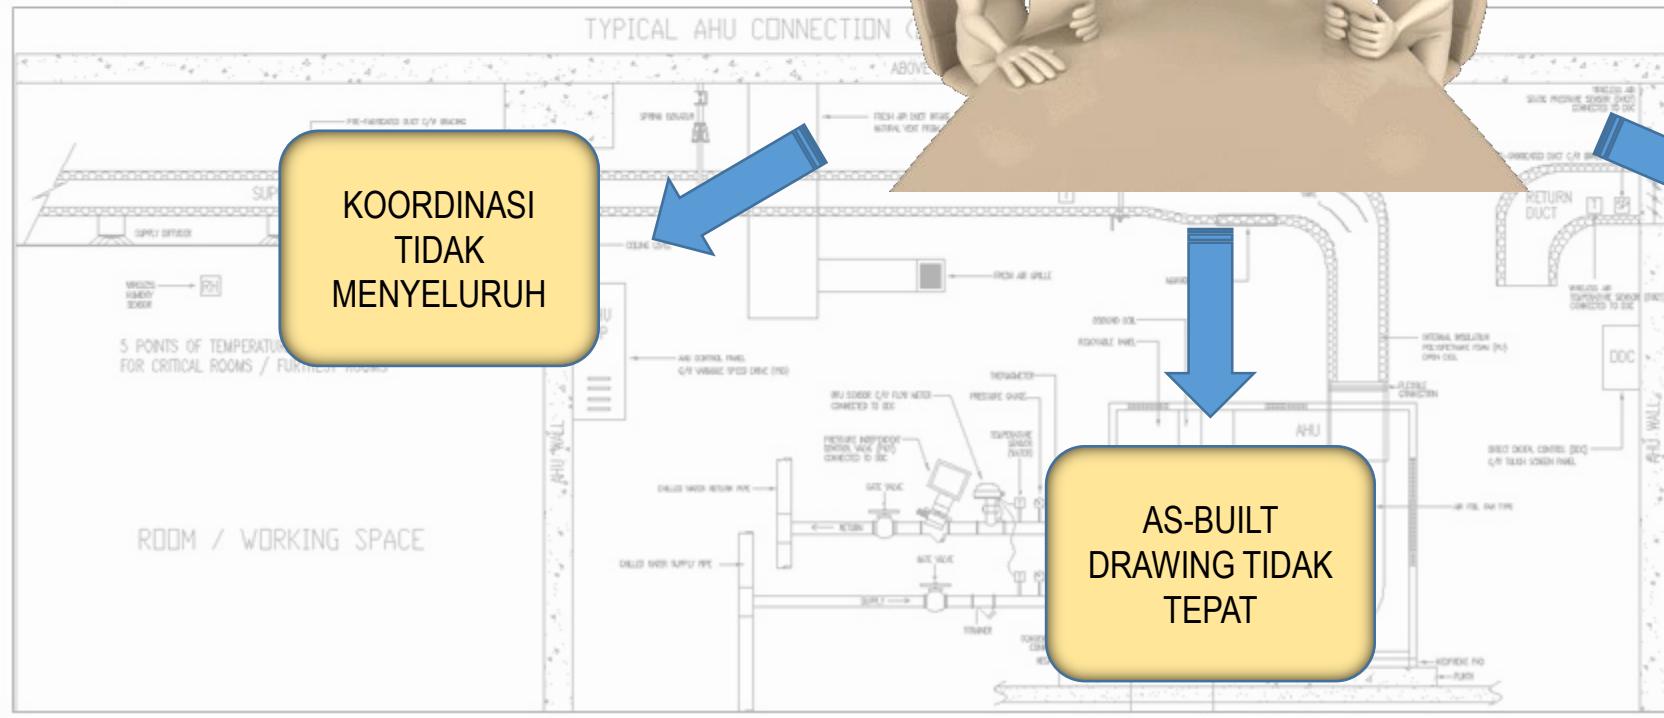

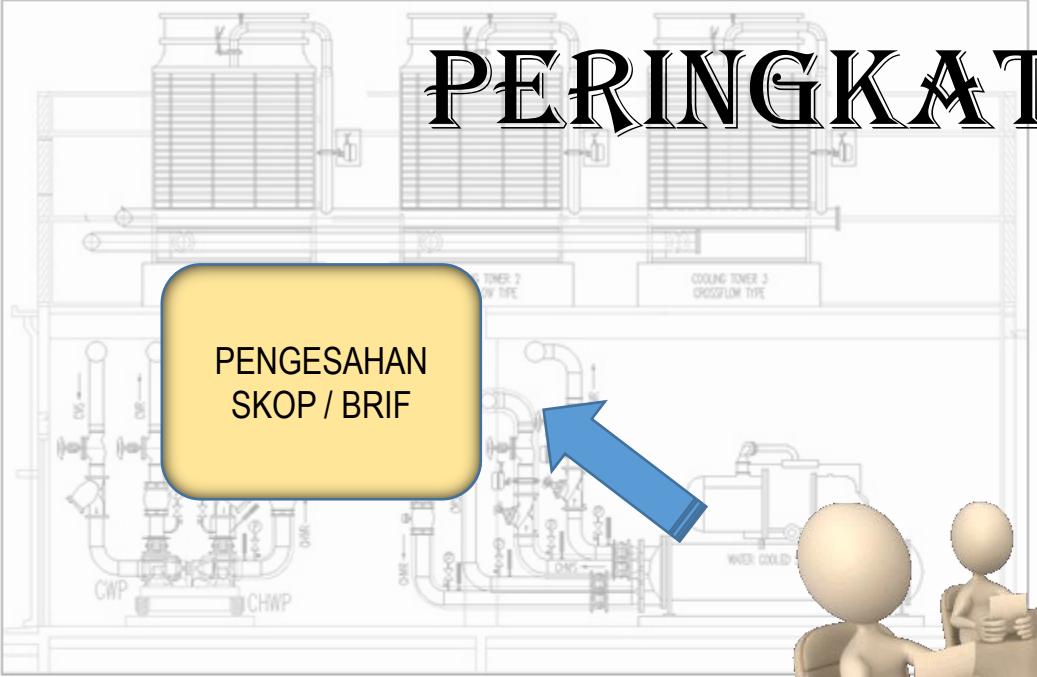

SISTEM PENCEGAHAN KEBAKARAN

- Sprinkler System
- Hose Reel System
- Wet Riser System
- Automation Detection System (Addressable)
- Smoke Spill System
- Clean Agent System

SISTEM LIF

- 2 nos of lift (passenger lift)
